How to Use ArtBreeder for Text-to-Image Generation

1. Sign Up or Log In

1. **Visit the ArtBreeder Website:** Go to [ArtBreeder](#) and click **Sign Up** or **Log In** if you already have an account.
2. **Free Account:** ArtBreeder offers a basic free tier that provides enough credits for experimenting with text-to-image generation and other features.

---

2. Accessing Text-to-Image Features

1. **Navigate to the "Create" Section:** Once logged in, select **"Create"** on the navigation bar.
2. **Select "Prompter":** This tool allows you to generate images from text.

---

3. Enter Your Prompt

1. **Type Your Description:** In the text box, write a descriptive prompt for the image you want to create.
   - Example Prompts:
     - "Futuristic cityscape with neon lights at night."
     - "Surreal forest with floating islands."
     - "A dreamy, pastel-colored mountain landscape."
2. **Be Specific:** More detailed prompts often lead to more accurate results. Mention style, color schemes, or desired details, such as "a realistic painting of a sunset over the ocean."

---

4. Generate and Refine

1. **Click "Generate":** ArtBreeder will produce an initial image based on your prompt.
2. **Evaluate the Result:** Notice if the image matches your vision. If not, revise your prompt. Experiment with wording and style details to refine the output.

---

5. Save Your Creation

1. **Download the Image:** Once you're satisfied, click **Save** or **Download** to store the image locally.
2. **Document Your Prompt:** Keep track of which prompts produced successful outputs so you can replicate or tweak them later.
